

## **TRATTAMENTO DEL RIGETTO ACUTO CELLULARE**

We suggest considering treatment of subclinical rejection or of borderline acute rejection. (2D)

We recommend corticosteroids for the initial treatment of acute cellular rejection, unless the clinical conditions suggest a more aggressive first-line treatment. (2C)

We suggest adding or restoring maintenance prednisone in patients not on steroids who have a rejection episode. (2D)

We suggest using lymphocyte-depleting antibodies for acute cellular rejections that do not respond to corticosteroids, and for recurrent acute cellular rejections. (2C)
